

INSURANCE ON CHURCHILL ROUTE IS LOWERED

Ottawa.—During the open season of navigation for a well-flooded vessel, the risk of casualty is little, if any, greater on the Hudson Bay route than on the voyage to Montreal.

This is not the statement of a western board of trade, or of the On-to-the-Bay Association. It is the considered opinion of the Imperial Shipping committee, of London, and features the fifth report of the committee on Hudson Bay insurance rates in which a reduction in hull insurance rates for the 1934 season is announced.

The reduction is 10 shillings per cent, which means 10 shillings per 100 pounds sterling of insured value.

Instead of paying 50 shillings per cent, as they did in 1933 and 1934, which works out at approximately 3 1/2 per cent, shipowners this year will pay 40 shillings per cent, or approximately 3 per cent.

If ships are equipped with gyro compasses they will only pay 30 shillings per cent, or about 2 1/2 per cent.

These premiums will be the minimum charged for the suspension of the British North American warranty clause in all marine hull insurance contracts. The ordinary marine policies permit a vessel to sail the seven seas, with the exception of certain routes which are covered by special warranties. If a vessel desires to enter these routes an additional premium must be paid for the suspension of the warranty.

The fifth report of the Imperial shipping committee while it announces this reduction in hull insurance rates and forecasts a further reduction if no casualties occur during the present season, does not hold out hope of extending the navigation season. And while admitting that, last year, hull insurance on the bay was six times higher than on the St. Lawrence, the report goes on to say that underwriters do not base premiums charged on known facts as much as upon recorded results and the volume of traffic. This reflects, undoubtedly, to the loss of the Bright Fan and to the inevitable disparity between the number of ships which use the St. Lawrence and the number which sail into Hudson Bay.

Chief importance of the report, therefore, would seem to be that little is to be expected by way of a longer navigation season on the bay and that in future the trend will be higher insurance rates imposed on the bay route are to be justified by lack of traffic volume and not by navigation conditions. While the report does not actually say so, the language used clearly implies that the committee regards the bay route as safer for shipping than the St. Lawrence.

Marketing Act

Hon. Robt. Weir May Be Minister In Charge Of Measure

Ottawa.—"In all human probabilities," Hon. Robert Weir will be the minister to administer the Marketing Act. This is the information given by Hon. Hugh Guthrie in the House of Commons when pressed by Hon. W. R. Motherwell, former minister of agriculture, who pointed out that the bill itself did not designate the minister.

"For greater convenience," said Mr. Guthrie, "and some elasticity the bill has been drafted in its present form as it is realized that agriculture is not the only natural product involved. I do not think I am going out of my way if I say that we may assume the minister of agriculture will be the man."

Pennyworth To Be Scrapped

Montreal.—Manseau Shipyards, Limited, of Sorel, Que., has purchased the British freighter Pennyworth. It was learned here, and will scrap the vessel. The price could not be learned. The Pennyworth grounded last autumn on the Island of Orleans, near Quebec City, and all efforts to free her proved unavailing.

Crack Distance Flyers

Paris.—France's crack distance flyers, Paul Codos and Maurice Rossi, are considering plans for a Paris to Los Angeles or San Francisco flight in an attempt to smash their own non-stop record.

Destroyer Taken Over

Libon.—A crew of British tars took over a Portuguese-built destroyer here in behalf of the Columbia navy.

W. N. U. 2047

Boost Tourist Industry

Proposal Is Made For New Cabinet Post In This Connection

Ottawa.—A new cabinet post, that of minister of the tourist industry, was advocated before the senate tourist committee.

The new portfolio was proposed by Morgan Eastman, Toronto, former director of the Greater Vancouver tourist bureau and one of the organizers of the Puget Sounders, a bureau co-operating between Vancouver and Seattle, Washington.

Present provincial tourist activities are inadequate, Mr. Eastman said. The transportation companies are mainly concerned with the prospective tourist, traveling by rail, while 75 per cent of the tourists entering Canada come by motor. The bureau maintained by various cities have a purely local motive. There is not at present a national tourist consciousness designed to boost all of Canada and not the separate provinces. These were the reasons given for creation of the new portfolio.

The government has developed some wonderful attractions in our national parks, said Mr. Eastman. But these attractions are not being sold to the extent they should be in foreign countries.

"Why not have a new federal bureau placed under the direction of the minister of trade and commerce?" asked Senator Creighton MacArthur, Summerside, P.E.I.

The Canadian Pacific and the Canadian National Railways presented a joint brief to the committee, based on the present tourist advertising activities of the transportation companies.

The brief was prepared by J. Murray Gibson, general press representative of C.P.R., and C. K. Howard, manager of the tourist and convention bureau of C.N.R.

The railways advanced the opinion that advertising in the United States under the government's own name might react unfavorably, tending to be denounced as propaganda.

Marketing Bill

Mackenzie King Approves Proposed Changes In Act

Ottawa.—A significant statement by Mr. Mackenzie King that the amendments proposed to the marketing bill by Hon. Robert Weir had met some of his objections to the measure was made in the house.

The Liberal leader went further and suggested that if the government changed the legislation in respect to the powers of the boards to enact regulations and made such power a government responsibility, so far as I am concerned I would cease to have any opposition to the measure as a measure of an experimental character."

Mr. King stressed that one of the basic things in the British constitution was the control of parliament over expenditures. This principle was ignored in the measure, he said. Expenditures under the bill should be made by appropriations of parliament. Strong exception also had been taken by the opposition, he said, to a particular group appointed to investigate and determine what was to be an offence.

"I am glad to notice the government had taken account of the force of the exception taken to these clauses," said Mr. King, "and is proposing to make a material change which will meet all that there was in the nature of opposition to that part of the measure. The government is proposing to do away with the word 'determine' and substitute the word 'report'."

"That means that when an investigation is held a report will be made by the investigators to the minister and to the government. The report will be public, and undoubtedly will be serviceable in helping to make more effective the law with regard to preventing the enhancement of prices or the restraint of trade which is unreasonable and unfair."

Northern Flight Record

Edmonton.—A new record was established in northland flying when Pilot Archie McMullen, Canadian Airways, flew into Fort Resolution and returned to Fort McMurray in the afternoon with a load of six passengers and a heavy consignment of furs. This flight is two weeks ahead of the previous earliest flight into Resolution.

Narrow Nationalism

London.—The chief obstacle to the attainment of international security is a spirit of narrow and self-seeking nationalism which refuses to pay the price whereby security and recovery can be achieved, Sir John Simon, the foreign secretary, told the House of Commons.

Withdraws From Commons

Mitchell Hepburn To Devote Time To Ontario Provincial Affairs

Toronto.—Mitchell F. Hepburn, Ontario Liberal leader, announced he would submit his resignation as member of the Dominion parliament to Rt. Hon. W. L. Mackenzie King, Liberal leader.

Mr. King will hand Mr. Hepburn's resignation to the speaker of the house on June 11, the day before the official nominations in Ontario.

"This should set at rest all doubt as to whether I am withdrawing from the Dominion parliament and devoting my whole time henceforward to the leadership of the Ontario Liberal party in the provincial election campaign," Mr. Hepburn declared.

Covered With Dust

Ship At Sea Does Not Escape Prairie Dust Storm

Boston.—The prairie dust storm which swept a large part of the eastern United States, left a blanket of prairie soil on at least one ship, many miles off Cape Hatteras.

Captain Overbrook, master of the tanker F. Q. Barstow, reported to the naval hydrographic office here that during the early hours of last Saturday the ship seemed to be enveloped in a foggy blanket of what seemed like thick salt spray. When daylight came, he found the craft covered with between 1-16 and 1-8 of an inch of dust.

PROPOSAL MADE TO ABANDON ARMS PARLEY

Geneva.—A proposal to abandon the disarmament conference and report its failure to the League of Nations council was tentatively launched by conference leaders.

Although the idea has not been formally presented, it is known to be under consideration by statesmen seeking to inject new life into an ill patient.

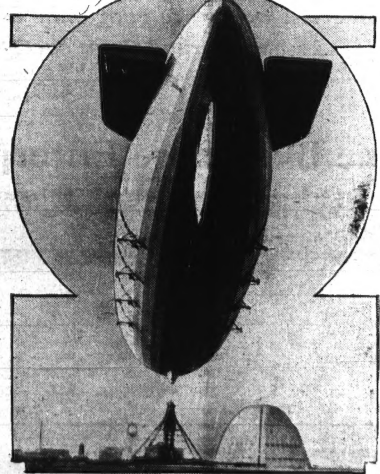

Encouragement for friends of disarmament came at the same time in a statement of France's foreign minister, Louis Barthou, that he had not given up hope of an agreement and in reports that Germany is considering returning to the conference.

Indications are that the powers are trying to force France to show her hand on the question of guarantees, and that France is trying to induce Great Britain into a pact for mutual military aid in the event that either France or Britain is attacked.

Foreign Minister Barthou's proclamation tended to counter the move for eventual conference adjournment.

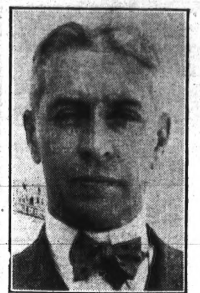

The impression prevailed here that disarmament will continue in a deadlock until the 1935 Saar plebiscite decided whether that area will be returned to Germany, and until Germany herself returns to the conference.

U. S. SOUNDS DIRIGIBLE'S DEATH KNEEL

The pride of the United States Navy Air Force, the giant airship Macon, is pronounced a failure after being unable to defend herself in fleet manoeuvres off Cuba. In addition to her theoretical destruction by aeroplanes, the Macon sustained new actual damage which necessitates repairs in Florida. This is the second occasion in recent weeks that the giant airship has had to put in for repairs, and many believe unless she shows better in her new tests with the fleet, no more airships will be built by the United States. Here we see the Macon swinging in the breeze as she lies anchored to her mooring mast.

MAY HEAD BOARD

Hon. Gordon Harrington, former premier of Nova Scotia, and now leader of the Opposition in that province, who is mentioned as a possibility for the post of chairman of the Board of Railway Commissioners. The vacancy was created when Hon. C. P. Fullerton became chairman of the Board of Trustees of the Canadian National Railways.

Canada Not Dumping Wheat

General Manager Of Wheat Pools Denies Published Report

Winnipeg.—Denial of published reports the Dominion government will dump its wheat holdings on the market was made by John I. McFarland, general manager of the Canadian wheat pools.

Rumors have been current among the grain trade for several days forced selling of government holdings was contemplated.

The Ottawa correspondent of a weekly financial journal reported: "With about three months of the crop year remaining, it is learned the Dominion government intends to force wheat on the market in order to bring Canada's exports up to the London wheat agreement total of 200,000,000 bushels. Sixty million bushels of Canadian wheat remain to be sold before the end of July and information here is that the wheat will be marketed notwithstanding slight price losses which may result."

Mr. McFarland stated no such policy has even been discussed in Canada.

Lost Race With Fire

San Diego, Cal.—Overcome on a mountain trail in a desperate race from flames fanned by a strong wind, three Serra camp members perished in the forest blaze near Julian. The men, with about 22 others, had raced to safety from flames which threatened to trap them in a gulch.

To Be Deported

Montreal.—The first stayaway of the trans-Atlantic shipping season here is Charles Kinnard, 28, native of the Isle of Man. He landed from the freighter Carmona, out of Newcastle. He pleaded guilty and was sentenced to four weeks in jail, after which he is to be deported.

Saskatchewan Claims

Natural Resources Case Presented To Dynart Commission

Ottawa.—Saskatchewan's claims against the Dominion, growing from federal administration of the province's natural resources from 1905 to 1930, were presented formally before the Dynart royal commission.

The commission has been sitting since February 5, with long adjournments necessitated by hearings in Regina as well as Ottawa. A vast amount of documentary evidence was submitted by both sides previous to the opening of oral arguments.

P. H. Gordon, Regina, chief counsel for Saskatchewan, placed the province's total claim at \$161,629,751. This was made up of a claim for 31,000,000 acres of land the province charges the Dominion with having alienated, with a tentative value of \$4 per acre; total of \$124,200,460 with interest; loss of taxes, \$2,538,535; loss of grazing rentals, \$1,157,809; loss of timber revenue, \$26,598,276; school lands and school land endowment fund, \$7,137,571.

J. MacGregor Stewart, Halifax, chief counsel for the Dominion, advanced tentative counter claims of \$170,000,000.

The Saskatchewan Act was passed in 1905 only after a great deal of opposition had been smoothed out. Mr. Gordon told the commission.

When Saskatchewan entered confederation, September 1, 1905, the province was not permitted to exercise any rights with respect to administration and control of its resources, he said. The province was thus placed in a position of inferiority with the other provinces.

Advances In Aviation

First Inland Aerial Mail Service In British Isles

London.—Two notable advances in British aviation were announced with the maiden flight of the Scylla, largest air liner in the world, and inauguration of the first inland aerial mail service in the British Isles, to commence shortly.

The Scylla made her maiden flight to Farnborough for Imperial Airways, she carries 39 passengers, two pilots, a wireless operator and steward. She is powered with four 550 horsepower engines. The passengers are able to sleep and hear radio programs.

The airmail service, to open in a few days, will run between Inverness and Kirkwall in the Orkney islands.

NEGOTIATIONS BETWEEN WHEAT DELEGATES ENDED

London.—Ten days of private negotiations between the big four wheat delegates ended, leaving in doubt the question whether Argentina can be prevented from breaking the 1933 wheat agreement.

A report of the deliberations was being sent to the governments concerned, including Canada, the United States, Australia and Argentina.

It was indicated the report includes a tentative compromise arrangement under which no net amount would be loaned to Argentina on her quota under existing wheat export agreements.

It was known that during final sessions a firm demand was presented that Argentina reform its wheat sales practices before getting a bigger slice of the world wheat market.

Representatives of the Dominions and the United States were said to have stood pat on their insistence that Argentina must curb her alleged dumping. Dr. Thomas Le Breton, heading the Argentine delegation, came here May 6 in the hope of obtaining a 40,000,000 bushel loan.

In Motor Accident

Sir Austen Chamberlain Brained And Badly Shaken

London.—Sir Austen Chamberlain, former foreign secretary, was bruised and badly shaken up as the taxicab in which he was riding collided with another cab in Grosvenor square and overturned. Examinations showed no bones were broken.

Lord Dawson of Fenn, the king's physician, happened to be passing at the time of the accident and stopped his car to render aid. He was surprised to recognize the victim as Sir Austen and took him to his home. A bullet issued from Sir Austen's head was badly shaken and a great deal bruised when his taxicab was run into and overturned. Fortunately no bones were broken.

SEEK EVIDENCE FOR GRADE ON GARNET WHEAT

Ottawa.—Further evidence will be taken by the agricultural committee of commons before it reaches a decision as to the separate grading of Garnet wheat.

On the advice of Hon. Robert Weir, minister of agriculture, and endorsed by Hon. W. R. Motherwell, former minister, the committee took the view that absolute evidence of the necessity of such a change should be provided the thousands of farmers growing Garnet wheat before new grades should be instituted upon.

A sub-committee composed of A. M. Carmichael (Prog. Kindersley), W. H. Loucks (Cons., Rosemont), E. E. Purley (Cons., Qu'Appelle), John Vallance (Lib., South Battleford), Hon. Robert Weir, Hon. W. R. Motherwell, P. G. Davis (Cons., Athabasca), was appointed to decide on the evidence to be submitted.

At the opening of the meeting Hon. H. H. Stevens, minister of trade and commerce, who is sponsoring the bill for separate grading of Garnet, stated he was leaving the measure in the committee's hands.

Mr. Motherwell strongly opposed the bill. He did not go into the merits of Garnet wheat, reserving that for a later occasion, but he protested leaving the fate of Garnet wheat with the grain standard board, as he said the bill proposed. All the members except one on the board came from southern districts that did not grow Garnet wheat. The one member from northern districts was a grower of Reward, so Garnet had no representation on this board.

Mr. Weir, as at the former meeting of the committee, opposed any step to give Garnet a separate grading until there was proof that it was necessary. He dealt with the claims that Garnet was injuring Canada's wheat sales. At present Garnet is allowed in number two northern and in lower grades, but is not allowed in number one northern.

Ontario Elections

Premier Henry Announces Voting Day June 19th

Toronto.—The Ontario general election will be held June 19. Official nominations will be held June 12 and advanced polls on June 16 and 18.

Premier George S. Henry announced the dates and also dissolution of Ontario's legislature. Premier Henry made his brief announcement from the open window of his automobile as he left Government House. He had been conferring for 20 minutes with Lieutenant-Governor Herbert A. Bruce.

The lieutenant-governor signed the order-in-council providing for dissolution of the legislature and issuance of the writs. Premier Henry did not issue his election manifesto.

For three days Premier Henry and his cabinet have been in conference discussing the election date and preparing the Conservative manifesto. At the conclusion of the conference, the election date was forthcoming.

For weeks party heads have been campaigning in preparation for the election. Premier Henry and his cabinet ministers have delivered addresses at numerous nomination meetings, and Mitchell F. Hepburn, Ontario Liberal leader, has waged a busy campaign.

Saskatchewan Elections

Voters To Go To The Polls On June 19

Regina.—Saskatchewan voters will go to the polls Tuesday, June 19.

The date of the provincial election was officially announced by Premier J. T. M. Anderson. It will be the same date as the provincial vote in Ontario.

Election writs will be issued this week, Premier Anderson said, with Tuesday, June 12, official nomination day. Advance polls will be held Friday, Saturday and Monday, June 15, 16 and 18, respectively.

Heads Pasture Institute

Paris.—Dr. Louis Martin, one of the world's foremost authorities on contagious diseases, was named head of the Pasteur Institute. For 40 years Dr. Martin has been associated with the institute.

Will Build Submarines

Washington.—The \$40,000,000 item for the United States navy President Roosevelt included in his latest budgetary request to congress will be turned to the construction of submarines and destroyers.

RUBBER DOLLARS

HOW OFTEN have you and friend wife wondered how "the Joneses" seemed to do so much on their income? From remarks dropped by Jones, you're almost certain you earn as much as he. You're dead certain you and your wife are not extravagant or wasteful. Yet the Joneses do little things you can't afford—and have little things for which you can't spare the money. How come?

The truth is that the Joneses have a secret. They have discovered a way of putting rubber into dollars. Through the knowledge of this secret they have learned that a dollar can be stretched beyond its ordinary buying limits.

What is this secret? They read the advertisements.

In the advertisements in this newspaper, reliable merchants and manufacturers offer you their finest values. Before going to the stores to buy, shop here first. Compare products until you've found just what you want. Compare prices until you've pleased your purse. You'll save endless hours of weary walking. And you'll buy with the comforting assurance that every dollar has done its duty!

*Advertisements are guardians of your
pocketbook—read them carefully*

WHO SHOULD BE TAXED

The Clinton News-Record hits the nail on the head when it advocates the taxing of the man who lets his property go to wreck, rather than the man who keeps his property in good condition. As it is at present, the man who employs the painter and the carpenter to make his place more attractive, and who thus improves the appearance of the whole neighborhood, is penalized by increased taxation, while the man who allows his property to become an eyesore, and thus decreases the value of his neighbor's property is encouraged in his neglect by reduced taxation. Some day the people will wake up and demand a radical change in the assessment law, and revision courts, as has been the case in Whitley on several occasions, will absolutely refuse to help a man who lets his property run down.—Whitley Gazette.

"Capitalism is not a principle of our form of government, it is an accident," states Nicholas Murray Butler, president of Columbia University.

An exchange contained an item worded this way: "John Julius had the misfortune to break a leg on Monday morning. The limb was rushed to the hospital, where it was promptly set and is doing well." Nothing was said of what happened with the rest of John while the leg was in hospital.

FIVE ROSES
THE ALL PURPOSE FLOUR

Five Roses Flour is of uniform quality and texture. Every operation in the manufacture is supervised by experts who know how to bring out the rich, full flavor of the new improved wheat.

Test this famous flour with a prize recipe from the new edition of the Five Roses cook book, "A Guide to Good Cooking." There are over 300 new tested recipes and other useful information.

You may secure a copy of this cook book by forwarding a Money Order for 48 cents with your name and address to:

SUGGESTING A CLASSY
ALTA. GOVERNMENT

The Hanna Herald suggests that the next government of Alberta should be composed of publishers of weekly newspapers. In this way, the province could divorce itself from decadent party politics, obtain a government imbued with a large element of commonsense, and introduce a novelty into Canadian parliamentary life. And surely the accumulated wisdom of the cream of Alberta weekly newspaper editors could give the province real good government.

For premier we suggest A. L. Horton, of the Vegreville Observer. Mr. Horton looks like an ideal selection. He has been telling governments what to do for so long that he should have no difficulty in actually doing the things he has been advising. That's not a slam, even if it sounds like one.

Fred Turnbull, of The Red Deer Advocate, is hereby nominated as minister of public works. A level-headed business man with plenty of experience and a lot of good horse sense, Mr. Turnbull should fit in nicely on that job.

Minister of Finance, Charles Clark, High River Times, whose chief asset for that job is a nativity in Bruce county, Ontario. He wears no man's collar!

D. O. Wight, Cardston News, is hereby suggested as minister of education. No mistake made there!

Minister of Agriculture, Victor French, of Wetaskiwin Times, who combines farming with publishing. Minister of Municipal Affairs. A politician is needed here, so we'll nominate the only one in the weekly newspaper ranks—H. G. "Lucky" Thunell, Viking News.

Attorney General. Here's a stickler. Not a lawyer in the whole gang! But Ben Huckell, of the Innisfail Province, can fit in most anywhere, and so Ben goes down for this job.

Minister of Health, Mr. Conquest, Athabasca Echo.

Minister of Natural Resources. W. J. Bartlett, Blairmore Enterprise. The big boy can handle that portfolio!

Minister of Labor. Sam Hodson, Okotoks Review. 'Nuff said!

Minister without portfolio. Charles Willis, Stettler Independent. Have to have Charlie in.

Minister without portfolio. George Gordon, Ponoka Times.

Minister without portfolio. H. T. Halliwell, Coleman Journal.

Now we've left plenty of real good men out, but the above list will do for a starter to see how the plan works.

This government may not be a class government—but it will be a classy one!

OBSERVATIONS

No question, fishing is a great pastime for those who enjoy it, and East Kootenay with its many lakes and streams is a veritable fisherman's paradise. A good fisherman should be an entomologist, geologist and ichthyologist, and with a few degrees along these lines and a lot of work with the right arm eventually you can coax any fish out of his old swimming hole. You can fool the best of them. The story is told of the monster fish in Premier Lake that pulled Art Hayden's boat around that body of water three times and had to be snubbed to a tree. He landed it with a block and tackle and cooked it over a forest fire. At Hot Lake, Oregon, you can catch fish already cooked. You can get them parboiled or well done—just depends upon the temperature of the water in which you care to fish.—F.J.S. in Cranbrook Courier.

Col. Hugh Clark remarks: A lawyer argues that a man has the right to make a crazy will if he wants to. So he has, but some crazy person has the right to contest it, and some judge may exercise the right to give a crazy verdict. The better plan is to make a sensible will, or none at all.

District News
From Our Own Correspondents

HILLCREST HAPPENINGS

The first game of the Crows' Nest Base League series was played here on Monday evening between Blairmore and Hillcrest. G. E. Cruickshank, M.L.A., threw the first ball. Only five innings were played, Hillcrest winning 5-4.

Mrs. A. N. Warriner and daughter Mary returned from Calgary on Friday.

The Hillcrest girls softball team defeated Coleman 7-1 in a game here on Sunday afternoon.

Rinaldo D'Amico left on Friday last for Mission, B.C., where he has accepted a position.

The Hillcrest football team was defeated by Corbin 3-1 in a game played here on Saturday evening.

The stork visited Hillcrest on Monday, leaving a baby boy at the home of Mr. and Mrs. Firestone.

The dance sponsored by the Hillcrest football club on Saturday night was a great success.

The Hillcrest baseball team lost 10-4 to Bellevue on Friday evening at Bellevue.

Dave Lockhart, of Mountain Park, is a visitor in town.

Mr. and Mrs. R. Clarke and family were Lethbridge visitors over the week end.

The concert and dance on Monday night, sponsored by the Lethbridge Slavonic Society, was a huge success. The hall was filled to capacity for both the concert and dance.

Mr. John Shevels, of Bellevue, conducted the service in the United church here on Sunday evening.

A son was born to Mr. and Mrs. Fred Petrie on Friday.

Miss Audrey Martin accompanied her "Milk Maid" chorus to Lethbridge this morning, where the total will compete at the festival.

BELLEVUE HAPPENINGS

Mrs. McIntyre has arrived in town to spend a while with her daughter, Mrs. D. Hutton.

The Bellevue and District Horticultural and Industrial Society held a special meeting in Kerr Bros' store on Tuesday evening. The business of the meeting was the making of arrangements for the big event to take place on Labor Day, September 3rd. Bills announcing the event will be out soon.

Mrs. Davidson, a resident of Bellevue for a number of years, passed away on Wednesday at the home of her daughter, Mrs. A. Rhodes. She was in her eighty-seventh year, and had enjoyed good health up until the past few months. The remains were laid to rest on Friday at the Bellevue cemetery, Rev. Roy Taylor, of Coleman, officiating.

James Tutt spent the week end at Stavely, visiting Leo Duba and family.

The football game here on Saturday was a win for Coleman. The game was of a tame nature—not much to be excited about in either team. Coleman won on a penalty kick the score being 1-0.

The officials of the Mine Workers' Union were around town on Monday with the nation-wide ballot, asking "Are you in favor of the abolition of Section 98 of the Criminal Code?" and "Are you in favor of the immediate release of the five prisoners, among whom are Tim Buck and his comrades?"

The sale of work and home cooking by the C.W.L. ladies on Saturday in the parish hall was well attended. All goods were disposed of and a neat sum was realized.

At least one life was lost in the great fire at Chicago the early part of the week.

The hair on a woman's head grows no faster than the hair in her eyebrows. The difference is, the hair on the head has probably never been plucked. Next?

Local and General Items

F. S. Carr, B.A., school inspector for the Medicine Hat district, died recently at Medicine Hat. The remains were laid to rest at Edmonton.

Southern Alberta experienced rain the early part of the week, which greatly relieved the danger of drought.

Richard Meredith, former chief justice of the Ontario supreme court died Sunday at London, Ont., aged 87 years.

"Do as our dentist does," says an advertisement. How can anyone do that when his mouth is stuffed with cotton batting?

The Fraser sweepstakes bill to legalize lotteries was beyond the constitutional power of the Dominion government, the House of Commons was advised yesterday.

The Brockville Recorder states: Now even Germany wants her lost colonies returned to her. If they are given back, the allied nations may well ponder over the question of who won the war.

"What do we know about Cologne?" the teacher asked the class. For a moment there was silence, then a hand shot up and a small voice said: "Please, miss, that's where the odor comes from."

The appeal against the judgment of Mr. Justice Irvine, awarding Armand Powlett, victim of hazing, damages to the extent of \$56,860 was won by the University of Alberta when a majority judgment cut the amount more than half. The award of \$56,860 damage settlement to the boy's father, C. H. Powlett, was confirmed.

CAR'S NAME IN LIGHTS

The Chicago skyline will soon be dominated by the world's largest electric sign. Built for Chevrolet, the display is located at the north end of Grant Park, on the air rights of the Michigan Central railroad. It spans two driveways and six railroad tracks, and is said to be the only electric sign in the world to be built on the air rights of a railroad company. Plainly visible from a distance of six miles on land, and by vessels more than 10 miles out in Lake Michigan, flashing lights of the sign will fall upon the "Century of Progress" exposition grounds, two miles away. The steel structure, which contains 330 tons of fabricated structural steel, rises 275 feet from the ground level and is 153 feet wide. The distance from the ground to the bottom of the display proper is 122 feet. The display itself is 153 feet long by 148 feet high. It will be illuminated with 17,240 lamps and 1,100 feet of neon tubing. Wiring of this display consumed more than 2 miles of insulated cable and the display itself weighs approximately 150,000 pounds.

FINDS SWORDFISH OIL
NEW SOURCE OF VITAMINS

Research workers are persistent chaps and the vitamins are finding it a hard job to hide from them.

Now it's the liver oil of the swordfish that research has found to be rich in vitamins essential to health, and that discovery is important to Canada's swordfishermen—all of them in Nova Scotia—since it may mean that a chance will be opened up for them to market fish livers which hitherto have been only so much waste material.

Cod livers have had commercial value for years because of their vitamin content, although it was not until comparatively recently that it was discovered that the medicinal virtue of cod liver oil is due to the vitamins it contains. Hainbut livers, formerly valueless to the fishermen, took on a meaning in dollars and cents several years ago when research found out that they, too, are rich in vitamins. The same thing is probably likely to happen now in the case of swordfish livers, though some further work may have to be done on methods of processing them before they are used in oil-making.

The swordfish research does not happen to have been done in Canada, but in the United States. Federal fisheries scientists in the Dominion have accomplished a good deal of valuable work in the research field, but not in this particular part of the field. The United States investigations were conducted under the federal Bureau of Fisheries, which states that they have shown that the swordfish liver oil has "a remarkably high vitamin potency content." Indeed the content of Vitamin D, the anti-rachitic vitamin, is stated to be much greater than it is in other fish livers. So far as the size of the livers is concerned, the United States investigators estimate that a swordfish liver "represents about five per cent of the weight of the dressed fish as landed." Considered simply as a percentage figure, five per cent is not very big, but when it is remembered that swordfish often run to several hundred pounds a piece, it may be seen that their oil-bearing livers will tip the scales at substantial weights.

As already indicated, some Nova Scotia areas are the only Canadian waters where swordfish are taken, and in 1933 the catch amounted to 17,134 hundredweights. The landed value of the catch to the fishermen was something more than \$117,400. Most of the swordfish catch taken by Nova Scotia fishermen are exported in the fresh form to the United States where the fish are highly regarded.

Hon. Peter Smith, former Ontario treasurer, died at Stratford on Monday, aged 56.

Around \$750,000 has been appropriated by the Alberta government for road work in Alberta this year.

Unemployed of the Town of Blairmore, wishing to use the library, may call any night the library is open and get a membership card free.

EVERYBODY IS THE FUEL OF BUSINESS. STAY THE FUEL. AND YOUR ENGINE RUNS SLOWLY. NO FUEL, NO FUEL.

FISH EGGS AND FRY
PLANTED BY M.L.A.S.

More than 92,000,000 salmon eggs, fry, and fingerlings were distributed in selected Canadian waters during 1933 by the fish cultural service of the Dominion Department of Fisheries to assist in maintaining the abundance of fish for the benefit of the commercial fishermen. Distributions of sport fish eggs, etc., in the interest of anglers and angling clubs, amounted to approximately 17,000,000 and the total distribution, commercial fish and game fish together, was 109,271,000. Included in this total, in addition to eggs, fry and fingerlings, were a number of older fish of different kinds, chiefly game species.

The distributions were made from the forty establishments operated by the Fish Culture Branch of the department—37 plants in the Maritime Provinces and British Columbia, where the fisheries are administered by the department, and the other three in national parks in Alberta. The Alberta plants are operated by the Fisheries Department of the National Parks Branch of the Department of the Interior. Twenty-three of the forty establishments are main hatcheries, nine are subsidiary hatcheries, and eight are salmon ponds.

The eggs distributed had been collected by hatchery staffs during the preceding spawning seasons of the several species of fish, fertilized by milk from the male fish, and then, in most cases, kept in the hatcheries until they had reached the period of development known as the "eyed" stage. The fry and fingerlings which were liberated had been propagated at the hatcheries, and the older fish included in the distributions were hatchery-born and reared.

AFTER ACCIDENT SHE PUT ON WEIGHT

Kruschen Took It Off Again!

A woman sends the following account of the consequences of an auto accident in which she was involved: "A year ago I had a very bad automobile accident, which left me more or less a cripple. Having to lie in bed so long, and being unable to move, I began to put on flesh. When I was able to walk a little again, I found I was 144 lbs., and being just under 5 feet you may guess how I was placed. So I thought I would try Kruschen salts, and I must say they have done me a lot of good in every way—but chiefly in keeping my weight down. In three months I lost 6 lbs. Then I left off taking the Kruschen, and I soon went up to 142 lbs. again. So at once I got more Kruschen, and again steadily reducing. My weight last month was 134 lbs." (Mrs. W. H. M.)

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissues.

WORLD HAPPENINGS BRIEFLY TOLD

Nathan F. Gropper, Saskatoon, won the prize for the highest standing in second year dentistry at McGill University, it was announced.

Leon Trotsky has shaved off his famous beard and mustache to conceal his identity as he wanders about Europe seeking a new refuge, it was reported.

Winnipeg health authorities were seeking to stamp out a widespread but mild epidemic of measles. Altogether between Jan. 1 and May 12 a total of 4,685 cases have been reported.

The House of Lords approved in third reading the bill forbidding rodents. The measure, which had already passed through the commons, was designed to protect animals from unnecessary suffering.

Japan's first official move in the trade deadlock with the United Kingdom was an effort to induce the London government to modify the restrictions recently placed on imports from Japan.

Dr. Stewart Raaburn Kirk, assistant professor of pathology at the University of Manitoba, died at Winnipeg after a protracted illness. He was 35 years old and was a native of St. Andrews, Scotland.

The United States department of commerce issued statistics showing the value of foreign liquors held in bond warehouses to have increased from less than \$5,000,000 Dec. 31 to almost \$19,000,000 at the end of March.

If Canadian and United States wheat crops are reduced by one-third by the recent dust storms, it will be a "godsend," said Hon. Earl Brown, former assistant secretary of agriculture in the Wilson cabinet of the United States, in an interview at Toronto.

Citing the rapid decline in the number of cases of tuberculosis in Saskatchewan, Dr. A. E. Ferguson, superintendent of Saskatchewan sanatoria, expressed the opinion that within the next ten years the disease will practically have vanished from the province.

Donald Cameron McGavin, third year art student at United College, is a winner of the governor-general's gold medal for general proficiency in the faculty of arts and science at the University of Manitoba. He is the son of Dr. and Mrs. A. McGavin, Carman, Man.

(Introduced into Canada in 1900, the Alaska variety of oats soon became recognized as an excellent early variety for Eastern Canada. The very early variety is also recommended for Manitoba, Alberta, and British Columbia.

The total annual production of clovers and grass seeds in Canada has remained about the same in recent years.

Gardening

Successive Plantings Ensure Fresh Vegetables Until Late Fall

Doctors have finally convinced the public of the vital necessity of green things in the diet at all times and experienced gardeners have demonstrated that it is quite possible to produce these green things for at least six months of the year. The whole secret is to make successive plantings of the same vegetables, starting just as soon as the ground is fit to work with the peas, spinach, radish, cress and lettuce, continuing with these about three times at intervals of ten days and gradually adding carrots, beets, beans, head lettuce, cabbage, Coss Lettuce, Chinese cabbage, tomatoes, egg plants, lima beans, all types of corn, and something going right up to July.

Roughly speaking, insect enemies are divided into two groups—those that eat holes in the foliage and those that suck out the juices. For the first-named poison is usually applied, while the suckers are attacked with a burning spray which penetrates their hides. Often when both are present, a combination of poison and something that burns, such as lime sulphur and arsenate, give the best results. The larvae from the biting insects is usually very apparent, but the presence of the other kind is only shown at first by a withering or withering of the foliage.

For sucking pests, chief of which are the aphids or plant lice, spray with whale oil soap, a quarter pound of soap to a gallon and a half of water; nicotine sulphate, or "black leaf 40", or any other repellent secured from a reliable seed store. When fungus attacks the plants, the foliage usually turns yellow or white spots like mildew cover the leaves. Fungus is most common in warm, murky weather. Spraying with Bordeaux Mixture, or dusting with specially finely ground sulphur is advised. Sulphur dust will also protect hollyhocks and phlox from rust, if applied when the disease first shows itself. An ordinary tin can with the top perforated like a salt shaker makes a good duster. Cut worms, which eat through newly set out plants at the base of the stem, are poisoned by spreading sweetened bran mixed with Paris green or special mixtures about the plants. Where there are only a few plants to protect provide some with paper

While it is important to get a portion of seed in early in order to stretch out the season as long as possible, this stretching can also be carried out at the other end of the business. Incidentally for those persons who start to sow their garden too soon there are a dozen people who do not continue sowing late enough. In practically every section of Canada it is possible to continue planting such things as beets, spinach, radish, lettuce, carrots, beets, and corn, right up to July, and if well started plants can be obtained, this late work may include, tomatoes, cabbage and cauliflowers, too. Of course where the whole garden is put in late, say after the middle of June it would be well to hurry along a portion of it at least with quick acting commercial fertilizer and if possible, water. Cultivation, of course is essential.

When the really hot weather arrives, it is advisable to adjust the lawn mower so that it will not cut as close as it has been doing. Grass grows more quickly in the cooler weather any way so that it will only be necessary during the summer to trim rather than cut. There should be at least one half inch of grass, if not more, after cutting.

Bordeaux Dust
In combating flea beetles, or in treating potatoes for insect enemies, a Bordeaux dust may be used in place of the regular liquid Bordeaux spray. Such dusts can be purchased from all commercial spray companies ready mixed, or they may be prepared on the premises, provided a good mixing machine is available. The following is the standard formula for Bordeaux dust: Copper sulphate (dehydrated), and ground very fine) 12 pounds; hydrated lime, 8 pounds; arsenate of lime, 8 pounds—Vegetable Insects Bulletin, Dominion Department of Agriculture.

Destroying More Coffee
Armando Vidal, president of the Brazilian National Coffee Department, estimated that Brazil's coffee crop for 1934-35 would be 8,000,000 bags, while the carry-over would be 2,000,000 bags. The amount of coffee destroyed to date has been 77,156,000 bags. It is planned to destroy 5,570,000 bags more on June 30.

London has just received \$2,150,000 as its portion of this year's auto license.

FALSE TEETH

Dr. WERNET'S POWDER
Would you like false teeth to fit as firmly yet comfortably as if they had never been lost, about, laugh—all day long you can forget about them. Simply sprinkle on Dr. Wernet's Powder—secured by world's foremost dentists—like one powder that assures 100% perfect comfort. SPECIAL: FRATILE—this one-of-a-kind powder—positive—never—always keeps mouth clean and sanitary. Inexpensive—any drugist.

A Real Life Saver

Missionary Always Carries One To Make Savages Laugh

If you want to save your life from savages, just make them laugh. That is the advice of Rev. A. J. Dyer, one of a party of missionaries now visiting some of Australia's fiercest aborigines, voiced before starting from Canberra for Arnhem Land, in the northern part of the country. Troubles arose recently between the authorities and the natives, and the missionaries hope to pacify the warlike Mr. Dyer puts his faith in the persuasive powers of a tin squeaker. More than once, he said, he has saved himself from savages by playing the squeaker, with appropriate comic gestures and facial contortions, until he made them laugh.

"I like to see something that has plenty of funny lines," says a dramatic critic. Then why doesn't he buy a zebra?

Don't make the mistake of giving a man advice that doesn't confirm his own opinion.

Little Journeys In Science

VITAMINS

(By Gordon H. Guest, M.A.)
Among the notable discoveries made by scientists in recent years, is that of vitamins. While they are as yet not known to have shape, taste, weight or color, they have been found to be a very necessary part of the diet, and to prevent many forms of disease. They were first discovered to exist in certain foods by medical men who were experimenting with the effect of diet on health. At about the same time, food chemists came upon these mysterious characteristics which could not be classified with fats, carbohydrates, proteins or mineral matter, the known components of food, yet which seemed to have definite life-giving qualities. Work is being constantly done by scientists in many lands, in an effort to find out exactly what vitamins are, but so far they have only been able to classify them according to what characteristics can be observed. As far as is known, vitamins contribute no material substance or energy to the body, but they act as what chemists call a catalyst, that is, they speed up the life processes. Vitamins have been designated by letters in the alphabet.

Vitamin A is found in green vegetables, cod-liver oil and liver, and is growth-promoting. It was once thought it prevented a dread eye disease, but this theory is no longer held.

Vitamin B is found in vegetables, milk, wheat, fruit, Graham flour and yellow corn meal. It is one of the most important members of the vitamin family, for it prevents beriberi, a dread disease contracted by people who live on polished rice.

Vitamin C occurs in fruit and to a small extent in milk. This vitamin prevents scurvy, a disease which formerly took many lives.

Vitamin D occurs in cod-liver oil and prevents rickets in infants. Vitamin E is found in meat, the germ of the wheat seed and in numerous other natural foods.

Vitamin G, only recently discovered, is found in some types of yeast and has growth-promoting qualities.

Recipes For This Week

(By Betty Barclay)

MACEDONIA SALAD

(Serves 6)

2 cups shredded cabbage
1 cup shredded raw carrots
1 cup diced celery
1 tablespoon sweet onion, finely chopped
2 to 3 oranges
French dressing
Lettuce
Mayonnaise.

If vegetables are not crisp and fresh, soak in ice water 1/2 hour before shredding. Drain thoroughly. Mix vegetables with oranges, which have been pared and cut in pieces. Moisten with French dressing, arrange in lettuce cups and serve with or without mayonnaise, as preferred.

EGGS MOBILE

1/2 onion
1 green pepper
1 pimiento
2 teaspoons butter
2 tablespoons flour
2 cups canned tomato
2 teaspoons sugar
4 hard-boiled eggs
Salt and pepper.

Fry the sliced onion and chopped pepper in butter until tender. Add flour, tomato, chopped pimiento, sugar, salt and pepper. Cook together seven minutes. Add sliced eggs. Serve on buttered toast. A sprinkling of grated cheese can be added if desired.

Flight From London To Melbourne

Wiley Post Intends To Fly The Winnie Mae In Race This Fall

Wiley Post has announced that he is getting the Winnie Mae, the monoplane in which he circled the globe, into shape for a "two-day" flight from London to Melbourne, Australia.

The present record over that course is approximately one week. He will enter, he said, the MacRobertson international air race to be held next fall between the British and Australian cities.

MacRobertson has offered \$61,800 to the winner.

SUNDAY SCHOOL LESSON

THE LAST JUDGMENT

Golden Text: "We must all be made manifest before the judgment seat of Christ." II Corinthians 5:10.
Lesson: Matthew 23:1-46.
Devotional Reading: Psalm 96:1-7.

Explanations And Comments

The Judgment, verses 31-33. When the Son of man shall come in his glory, thus Jesus begins his parable of the Judgment. Compare Mt. 24: 30; 25: 19.

At the Last Judgment, so Jesus' parable declares, he himself will sit on the throne of judgment, and before him will be met all the nations, and he will separate them as the shepherd separates sheep from goats, putting the righteous on his right hand and the unrighteous on his left.

"You can fancy what was in the shepherd's mind when he said he would separate a day coming, 'as the shepherd separateth the sheep from the goats.' It is a passing line way, you see, it pictures what so many of us can explain, try as we will. Ah, they are a heady and quarrelsome stock, these goats. Cling everywhere, wherever you are, they are like selfishness on legs. All day the shepherd must ward him from them, as well as he can, and when folding-time comes he must make sure of snatching them off the common weal. And that, take it, is like the judgment. Goat nature must be parted from kindly sheep, no matter how often they have been together on the hills." (William Allen Knight).

Service for Others is Service for Christ, verses 34-40. To those on his right hand the Judge will say, "Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world."

The Fate of the Unrighteous, verses 34-40. To those on the left hand, the unrighteous, the King will say, "Depart from me, ye cursed, into eternal fire, where I prepared for the devil and his angels. The word for 'hell' is 'Gehenna.' Gehenna was a field outside the city walls of Jerusalem, to which the refuse and garbage of the city were carried and there burned.

Has No Explanation

How Sleep Comes About is Still A Mystery

Although almost a third of a person's life is spent in sleep, the problem of how sleep comes about is still a mystery. It has been supposed that during activity, fatigue substances accumulated in the blood and exerted a narcotic action on the brain, periodically inducing sleep during which they were excreted. Investigation of the theory has been that during sleep the conduction pathways in the nervous system are broken by the retraction of small contact points between the neurones, which are the conducting units composing the nervous system. If this actually occurred, it would stop the nervous activity just as effectively as pulling the plugs from a switchboard would stop telephone communication, but there is no evidence to support the theory. Sleeping sickness has been found to be accompanied by damage to a point in the midbrain near its junction with the forebrain, and this region has been found to have an important relation to the alternation of sleep and wakefulness.

A Home On Wheels

Edmonton Man Builds Comfortable Trailer For Holiday Trip

Designed and built entirely by himself and an assistant, a luxurious house on wheels has been completed by J. J. Barrie, of Edmonton, in preparation for a tour this summer.

The two-wheeled, four passenger cabin trailer was built by Mr. Barrie "just to show them that we can produce things in Edmonton as good as anywhere on the continent." It took six weeks to complete.

Equipped with electric lights, cupboards, beds, gasoline stove, sink and ice box, it is neatly finished inside in a green and cream color scheme. Its dimensions are 12 by 6 feet.

Admired Own Work

When Dr. Leonard Holman of Chicago made a set of false teeth for a lady customer he did a very extra special job—but that's where the trouble started. So fond was he of the product of his own art, he asked to borrow the teeth for a dental exhibit. She complied, she charged in court, but the dentist never returned her teeth. The teeth cost her \$64. The court awarded her a \$95 judgment, but the dentist keeps the teeth.

Hedges Will Thrive Best If the Soil Is Kept Cultivated and Free of Weeds to a Width of Two Feet or More on Each Side of It. An Occasional Top-dressing of Fertilizer may Prove Beneficial, Particularly on Light Soil.

FRETFUL BABIES Quieted!

"If my three baby boys were restless with colic or potholes from their teeth, I gave them Baby's Own Tablets and they were soon happy." Mrs. J. J. Wood, 1070 Wood Rd., Toronto. These sweet, non-alarming, non-toxic tablets soothe and quiet the colicky, fretful and the child becomes happy and well again. The cause of most ailments of little folk are promptly and safely corrected with Baby's Own Tablets. Price 25c at your druggist's. 10c Baby's Own Tablets 25c.

Tricky Thing To Handle

Extradition Law Not As Simple As It Looks

Extradition law is a tricky thing to handle. At first sight it seems a simple thing: If a citizen of Ruritania flees into Canada because he does not wish to be dealt with by the laws of his own country, Ruritania has every right to say to Canada, "Hand over our citizen, so that we may investigate these charges against him."

In actual practice it is not so easy, states the Cape Argus. To begin with a refugee can only be delivered up to the officers of the law if the offence charged is also an offence under the code of the country in which he has taken refuge. But these things differ. A man can commit a deed which is a great crime in his own country, but is punishable, and, by taking refuge in certain foreign countries, be free from anxiety, because it does not figure in the penal code of those countries.

A bank clerk in New York did some clever juggling with the funds under his control and went to London. Hot on his heels went a couple of New York detectives; and application for extradition was made. Unfortunately for his pursuers, his offence was described as "forgery," and in English law it is not so regarded.

Therefore, the Bow-street magistrate had no hesitation in refusing the application, and the sleuths from New York went away sorrowful.

Offences generally regarded in international treaties as extraditable are murder, attempted murder, or manslaughter, also such crimes against the community as arson, bigamy, embezzlement, fraud, counterfeiting and kidnapping. An absconding fraudulent bankrupt may also be pursued and brought back.

But mere wrongdoing, or doing bodily harm to a person, is not extraditable—unless permanent injury or incapacity is caused. So if you steal up your enemy and then flee to Spain or France, or somewhere handy, you are safe from the vengeance of your own country's laws.

There are one or two other odd points about extradition. Some countries will not deliver up their own citizens. Spain is one of these; so as an illustration, take the case of a Spaniard who offends against our laws and bolts to his native land. The Spanish authorities will not give him up to be brought back and tried. Spain's neighbor, Portugal, does not surrender refugees to countries where capital punishment is in force.

Other countries beside Spain who will not surrender their own nationals are Austria, Italy, Germany, Greece, Brazil and Switzerland.

By using X-rays, two generations of tobacco plants have been grown in one year.

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl," Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Other in the story are Avis Weth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off the beach by themselves and fall asleep on the sand. When they wake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they are married. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of \$1,000. Peter and Camilla are reconciled. Avis invites them to a party, at which she introduces Peter to well-known artists and public men.

(Now Go On With The Story)

CHAPTER XLIV.

"A title is always very important," Avis observed, and turned to Camilla. "Don't you think so? It has so much to do with the success of a book or play or picture. And it does with a piece of sculpture, also. It should strike the public's imagination, as well as being appropriate to the subject."

"Of course," Camilla agreed. She reflected that she probably knew more about that than Avis did. Wasn't that her obligation to her work—to attract the public eye with a few well-chosen words? "Have you anything in mind?"

"Several," Peter nodded, "but I've been so busy getting the unnamed thing finished that I haven't given it much thought. No use to have a name, however alluring, without an object to go with it."

"I had an idea the minute I saw it," Avis explained. "Just the one word, 'Inspiration' seems to me to fit it exactly. What do you think of it?"

Camilla repeated the word thoughtfully. "It sounds rather well," she hesitated.

Avis recoiled instantly. Her displeasure over Camilla's semi-enthusiasm was almost visible. She turned to Peter confidently. "Don't you like it better, the more you hear it? Doesn't it sort of grow on you?"

"I believe it does," he admitted, then turned to Camilla. "Have you a suggestion, dear? The committee is open to any new idea, and anxious for one."

"I've thought a lot about it," she confessed, smiling. "I have a list of ideas written down at home, but the best one I have thought of is 'Eager Youth'."

Silence for a moment, dominated by Tillie's clashing of china and silver in the kitchenette. "Say, that's hot, all right!" Peter exclaimed. "Well, you say little cricket—that had a whole page of titles topped by a prize win-

ner and you haven't said a word! He was immensely pleased.

"I was waiting for you to tell me your own idea first, so I wouldn't be influenced by yours," Camilla explained quietly. "I wanted the whole thing to be yours, title and all, unless you got stuck and I could help you out."

"Good," he enthused. "Am I in luck to have two women working their clever brains to name my stuff. It ought to be good!" He turned to Avis. "What do you think of that one, 'Eager Youth'?"

"Very good," she agreed instantly, but she thought to herself, "I'll handle you, alone."

"Anyway," Peter decided, "we have another week to think it over. It won't take long to scratch the title on when it's finished. Both of you keep up the good work and we'll vote on the final selection."

Camilla remained with Peter for what was left of the night, but it was only four hours later that she resolutely left him to his work and returned to her own apartment for a busy day of routine tasks, preparing her clothes for the following week, and an afternoon nap that refreshed her for the evening, when Peter came to take her to a movie.

It was entertainment which permitted them to relax as that of the previous evening had not done; and although they were in a crowded theatre, they might have been entirely alone for the two hours in which they sat close together in the darkness and watched the tragedy of human emotions on the screen evolve into the miracle of happiness. Their own emotions had been tense in the crisis of those make-believe lives, and it was with relief that they witnessed the final dissolution of all strife and misunderstanding.

"They always live happy ever after," Peter laughed.

"They should, after all that effort to deserve happiness. Not all stories end happily, but I like them a lot better when they do, don't you?"

"I guess everyone does. Still, you remember the tragedies longer."

"They should, after all that effort to deserve happiness. Not all stories end happily, but I like them a lot better when they do, don't you?"

"I guess everyone does. Still, you remember the tragedies longer."

Auto-intoxication

WHAT TO DO FOR IT:

Take a teaspoonful of Phillips' Milk of Magnesia with a glass of water every morning when you are eating. And another before you go to bed.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—25c and 50c sizes.

ALSO IN TABLET FORM
Each tiny tablet is the equivalent of a teaspoonful of Phillips' Milk of Magnesia.

Phillips' Milk of Magnesia

But if that fickle composite mind that is known as public opinion, chose to favor her work with its passing approval, her work would then turn to gold for her employers and, in turn, gold for her—and her work would be good!

Camilla telephoned to Peter during her lunch hour. "Have you seen the New Weekly Review?" her voice sang with exuberance.

"No, I haven't."

"Well, rush out and get a copy and feast your eyes on that middle spread, done by your very own wife."

"Will I! Congratulations, darling. I'm terribly proud of you. When do we celebrate?"

"When you finish the figure. Then it will be a double celebration for the famous Ansons."

"How, famous?" he laughed.

"Just among ourselves, for awhile. 'Okay, honey. I won't lose a minute getting that magazine, you can bet. I'll call you back later, and tell you what I think of this new Anson artist.'"

Camilla accomplished little work that day. Every employee and executive had to compliment and commend upon the initiation of the Tiny Tots into the world of affairs at large and advertising in particular. Each was optimistic regarding their popularity, and Camilla walked again on wings of feet with her head in the clouds of hope.

Her elation was not oblivious. If possible, she was more quiet and reserved than usual. For deep emotion is not expressed in sounds and actions. It is lived within the heart and soul. Only superficial emotion manifests itself in violent demonstration.

Plans to Visit Toronto

British Air Force Sending Four To Centenary in July

A fleet of four planes of the British Air Force will take part in the Toronto centenary celebrations in July, it was announced in the House of Commons by Sir Philip Sassoon, Under-Secretary for Air. The machines will be the Hawker Fury, the standard interceptor fighter of the Royal Air Force. They have a top speed at 15,000 feet of 214 miles per hour, and are extremely fast climbers. They are all-metal biplanes with a Rolls-Royce Kestral engine.

It has been found that aluminum becomes stronger in the bitter colds of high altitudes.

Love is blind, marriage is a skillful oculist says the Brandon Sun.

Spain has excellent scenery for exterior cinema films.

MATURITY—MATERNITY MIDDLE AGE

At these three critical periods a woman needs a medicine she can depend on. That's why so many take Lydia E. Pinkham's Vegetable Compound. 50c out of 100c jar. "It helps me."

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Squaring The Circle

Lawyer Claims He Has Solved Most Difficult Problem

The most baffling mathematical problem in history, which beat even Pythagoras—how to square the circle—has been solved at last. Said Popovitch, a middle-aged lawyer, from Nishi, claiming that he has done it. He started struggling with it as a schoolboy. He continued his efforts when a prisoner of war. He has been at it ever since—in the spare time he could wrest from his professional duties. Reports that an American mathematician had left a considerable fortune to anyone who could solve the problem, spurred Mr. Popovitch on in his efforts to work out this outstanding proposition. Now, at last, he declares that he has found the solution, but before he will disclose his formula, he makes a demand that a commission, appointed by the executors of the American's will, shall examine him and be convinced that the circle has really been squared.

Tenants Steal Building

Remove It Piece By Piece To Spit Landlord

Charged with stealing a building, several tenants of a row of flats have been arrested in Kuchel, Poland. Back of this is a case of revenge against the renters' landlord. Following a long series of clashes between the occupants and the owner, the tenants got together and decided to steal the building. Stone by stone, door by door, window by window, they removed their flats several miles away and reconstructed them. Calling to collect his rents the landlord found an empty space where his building had been. He aroused the village and a search was started. After many days the flats were found. Inside were the tenants, enjoying life without the shadows of a landlord's calls. The irate owner had them arrested, but is puzzling how he will get his building back where it belongs.

THE RHYMING OPTIMIST

By Aline Michaels

LIKE LAND-LOCKED SHIPS

When at the wharf I stand and watch the ships—
Take on the cargoes waiting at the shore,
See yawning hold and giant crane
its load more moment, then swings
its load for more.

I sense an eagerness to be away.
Its echo rings through every foreign
port.

Both ships and sailors ache for wind
and spray
And open seas to greet them, thrusting
out.

A kindred haste throbs sometimes in
The years' afloat shores press close
upon my heart.

To rest at anchor chained, too long
To long at anchor chained, too long
With all my cargo now I would de-
part.

Like land-locked ships, I would sail
back to sea,
Return full-freighted to eternity!

Game Increase In Rockies

Noted Guide Reports Larger Herds Of Goats And Deer

Big game animals are increasing in number in the hunting areas outside of the boundaries of Jasper National Park, according to reports from park wardens and from hunters, received by C. K. Howard, head of the tourist department of the Canadian National Railways, Montreal, which handles hunting and fishing activities in the Dominion.

Jack Brewster, noted big game guide and outfitter of Jasper, reports that in two trips with hunting parties last fall he encountered 1,154 big game animals, including bunch of 104 Rocky Mountain goats and 87 bighorn rams in addition to caribou, moose, deer and other game. Both parties of hunters secured full bags of trophies without difficulty.

A new bait for grasshoppers is being tried out by the U.S. Department of Agriculture. It consists of bran and arsenic. Oil baits, it is stated, do not deteriorate during storage as rapidly as molasses. In Canada, water-mixed bait has been found to have a distinct attractiveness to the insect because grasshoppers like to drink when they eat.

Delmas, the triangular shaped area of land deposited at the mouths of rivers, are so named because of their resemblance to the Greek letter Delta.

Quick Relief Now From Neuralgia

JACK, IN TO SEE CLARK ABOUT THAT BIG ORDER IN 40 MINUTES AND I HAVE TENSIC NEURITIS. WHAT CAN I DO?

DON'T WORRY! GET SOME ASPIRIN. TWO TABLETS WILL STOP THAT PAIN IN A FEW MINUTES.

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disappear, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain it has been found. The illustration of the glass, here, tells the story. An Aspirin Tablet placed in a glass of water, you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Cunard Sailings

Initial Trans-Atlantic Trips Marked By Heavy Passenger Lists

The St. Lawrence season of the Cunard and Anchor-Donaldson Lines opened recently with the arrivals and departures of the Ausonia and the Athenia. The Ausonia made her first appearance early in May and from now on, these companies will maintain practically a weekly service to Plymouth, Havre and London and to Belfast, Glasgow, and Liverpool, throughout the summer and autumn until the close of the St. Lawrence.

Lines on this route will, beside those mentioned, include, The Letitia, Alania, Ausonia, and Aurania.

The initial departures have been marked by heavy passenger lists in all classes and this, with the advance reservations already made up, summer sailings would indicate that this will be a good year for trans-Atlantic business.

Slight increases in exchange rates in certain European countries have been more than offset by falling prices abroad; the many lands, hotels and railways have reduced their tariffs by as much as half.

Indications are that this will also be a good cruise year. Last winter the veteran Mauretania in her all-white dress and with her gaily decorated rooms, enjoyed enormous popularity in her West Indies' cruises from New York. After being newly refurbished, she will make similar short "sea-breeze" cruises to the West Indies from New York, commencing July 21.

On June 26th the Carinthia will make a cruise from New York to the North Cape and Russia. Short cruises to the Saguenay, Quebec, Munster Bay and Bermuda will also be made on the California, Transylvania and Franconia, some cruises including a call at the Bay of Islands in Newfoundland.

One of the most popular cruises will probably be that made by the Franconia on September 18th from New York, to South America. Under the joint management of Thos. Cook & Son, American Express Co. and the Cunard Line, this cruise will carry hundreds of Canadian and American pilgrims to attend the Eucharistic Congress being held this year in Buenos Aires. Calls will be made in Havana, Trinidad, Rio de Janeiro, en route to and from the Argentine Capital.

The popularity of the short cruise in Britain has been phenomenal. This year will see an extensive programme of such excursions from Liverpool, Glasgow, and Southampton to the Atlantic Isles, and the Mediterranean and around the British coasts.

Looks Like Prosperity

If innumerable 10 and 20-dollar bills are a sign of prosperity, then it has arrived in Nova Scotia at last. Sydney merchants, restaurant proprietors and insurance companies, have been kept on a constant trek to the banks to change the yellow-backs proffered by their customers for bills of smaller denomination.

Great Salt Lake in Utah is more than four times as large as the Dead Sea.

There are at least 60 stars to every man, woman and child on earth.

Little Helps For This Week

"Obey my voice and I will be your God and ye shall be my people; and walk ye in the way that I have commanded you, that it may be well unto you." Jeremiah 7:23.

And oft, when in my heart was heard Thy timely mandate, I deferred The task, in smoother walks to stray; But Thou I now would serve more strictly, if I may. —W. Wordsworth.

Pray Him to give you what the scripture calls "an honest and good heart", or "a perfect heart", and without waiting begin at once to obey Him with the best heart you have. Any obedience is better than none. You have to seek His face, obedience is the only way of seeing Him. All your duties are obligations. To do what He bids is to obey Him, and to obey Him is to approach Him. Every act of obedience is an approach, an approach to Him who is not far off though He seems so, but close behind this visible screen of things which hide Him from us. —J. H. Newman.

As soon as we lay ourselves at God's feet we have enough light given to us to guide our own steps; as the foot-soldier who hears nothing of the council that determine the course of the great battle he is in, but hears plainly enough the word of command which he must himself obey.—George Eliot.

When Accidents Happen

Fatal Hour For British Road Accidents Is Between 5 and 6 P.M.

Between 5 and 6 p.m. is the fatal hour for British road accidents, it was shown in an analysis of accidents released by the ministry of transport which has been much concerned with the increasing loss of life.

Fatal accidents raise to a small peak between 7 and 9 a.m., drop during the morning, rise again between 12 and 1 p.m., drop in the afternoon and reach their highest point in the evening "rush hour."

This is only for working days. On Saturdays, Sunday and holidays most fatal accidents occur between 10 and 11 p.m.

Queen May Launch Liner

The British government announces that the King and Queen hope to go to Glasgow at the end of September to launch the new giant, Cunard liner "534". Her Majesty, the announcement said, will perform the actual ceremony of launching the vessel.

A strike is threatened at Michel. Leo is seriously considering the purchase of an hotel in Blairmore.

Saturday next, May 26th, will be the sixty-seventh birthday of Her Majesty Queen Mary.

Chicago stock yards suffered from fire early in the week to the estimated extent of \$8,000,000.

Street car rails are being assembled in Blairmore.

E. L. Fuller, newly-appointed high school inspector, is in town today from Edmonton.

A kid at the local school, when asked: "What do you know of Newfoundland?" answered: "A number of fish live there."

According to a report published in the Lethbridge Herald yesterday, "Harvey Murphy, Canadian Mine Workers' Union organizer and well known radical leader of Blairmore, tried to speak, but was voted out of the hall at Michel."

**Local and General Items**

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, etc. Phone items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

Mr. Hill, C.P.R. claims agent, was in town from Lethbridge today.

At a recent meeting of the local school board, a resolution was passed, terminating teachers' contracts at the end of June.

Messrs. Sprout and Dawson, of Calgary, and Dan O'Rourke, of Edmonton, were among the travellers noticed in town during the week.

A meeting of the Blairmore Amateur Athletic Association is to be held tonight at 8 at the Greenhill hotel, when important business will be discussed.

The Pythian Sisters will hold an afternoon Tea and Sale of Home Cooking, and also have a table of plain and fancy sewing, in the Lodge hall, Blairmore, on Saturday, May 26th, from 3 to 6. Everybody welcome.

Some new act or amendment to the town and village act, being 481 of Chapter 49 of the statutes of Alberta, providing certain clauses, has been announced through the Alberta Gazette. As to the contents of which the public has not been informed.

Here's a joke: A sum of \$5,000, was placed in the Dominion government estimates, and the question was raised as to whether it would be for a new post office or a customs house. (Sad to relate—the money never arrived here.) — Yes, it was budgeted for Wainwright—Wainwright Star.

Next week's issue of The Enterprise will appear on Thursday as usual. We guarantee, absolutely, 100% of our paid circulation which includes 320 homes in Blairmore. This is not "bull." We also guarantee that every copy lands in the homes, is not hung around the gate latches or scattered on the streets.

Evidence that the present town council are making a determined effort to improve the streets of the town can be seen in various directions, particular attention now being paid to streets in the Pelletier addition, which are being built up with gravel and shale and graded. Side-walks of shale and plank are also being installed, and the work is considerably relieving the unemployment situation.

Once again it becomes necessary to warn children against playing around the railway tracks. Only recently a boy was killed near Coleman, while in the past quite a few serious accidents have happened at various points through The Pass, in which children have lost legs, arms, etc. Of late, boys and girls have got into the habit of hanging around the tracks in Blairmore, particularly when a freight train is standing or in motion, and unless they abandon the practice, prosecutions will undoubtedly follow. We would suggest that strong warning be given by the teachers to the children at the school.

Bulletin boards were erected by the town at several convenient points some months ago, but the town's biggest and most popular bulletin board is the windows of The Enterprise office, where copies of all bills and bulletins printed by us are given prominent positions. Today's display contains the following announcements: Sale of cedar posts at Cowley; dance at Crows' Nest Lake on Tuesday, June 5th, with Mart Kenny's orchestra; Football Club dance in the Community hall at Coleman on May 24th; dance at Crows' Nest Lake Pavilion tonight; Softball Club dance at Lundbreck on June 1st; Empire whist-dance in the local lodge hall tonight (Wednesday), and Junior C.W.L. dance in the Columbus hall on June 1st.

R. J. Dinning, Alberta liquor commissioner, was in town from Edmonton on Thursday last.

Mr. Roberts, federal income tax inspector, was in town this week from Calgary.

Mr. F. Antrobus and Freda, of Coleman, are attending the musical festival at Lethbridge.

Repairs to the approaches of the river bridge at Sixth Avenue were effected during the week. The bridge was also treated to a coat of paint.

Mr. and Mrs. H. Sullivan and daughter Margaret, of Hillcrest, are leaving shortly for their old home in Wales.

Miss Jean Elliott, of Chapman Camp, who had the misfortune in a fall at her home recently to break a collarbone, has been able to leave the hospital and return home.

EYES EXAMINED at the Blairmore Pharmacy on Saturday afternoon, June 2nd, E. J. ANDERSON, B.Sc., in attendance. Free demonstration of the new Amplified Acousticon Aid to hearing.

E. F. Gare and family were Cranbrook visitors during the week, motoring through from a holiday trip to coast points. Mr. Gare was formerly editor of the Coleman Journal, disposing of his interests to H. T. Halliwell, the present proprietor.—Cranbrook Courier.

Mr. and Mrs. William Harrison returned Friday afternoon last from a pleasant two weeks spent in the vicinity of Creston. They were accompanied back to Blairmore by Mrs. Joseph Handley, their daughter, who will be spending a while with the aged couple here.

A real old landmark is disappearing from the local horizon this week. The original portion of the Alberta hotel building, an annex, but some twenty-five years ago the hotel proper, has been purchased by J. Slopek, and is being torn down and removed to be rebuilt near Ninth Avenue between Stuart and State streets as a residence.

We are asked not to criticize, but who ever heard of the right of any school board to vote money for any purpose not provided for in estimates? This is what is threatened in Blairmore. Evidently the present board figure they are so flush with money that they can give away \$2500 of current funds towards a municipal hospital which is not yet established or endorsed by the ratepayers, and which possibly may never be. No doubt, higher authorities will have a say in the matter.

IN MEMORIAM

In loving memory of our dearly beloved son and brother, Edward Ennis, who passed away May 25th, 1930. "There is some one who misses you sadly, And finds the time long since you went. And I think of you daily and hourly, But try to be brave and content. But the tears that I shed in silence, And breathe a sigh of regret; For you were mine, and I remember, Though all the world forget. What would I give to clasp your hand, Your dear sweet face to see; To hear your voice, to see your smile, That meant so much to me. You left behind an aching heart, That loved you most sincere— I never did, nor never will Forget you, Edward dear." Ever remembered by mother and family.

H. B. Hulbert, district agent for the Commercial Life Insurance Co., was in town today.

We are told that we were in error last week in stating in this column that A. Morris had appealed against a conviction and fine.

The weather man promises a glorious day for the Cowley sports tomorrow. We haven't heard of anyone in this district who will not be there.

The condition of Rt. Rev. Neil McNeill, Roman Catholic archbishop of Toronto, formerly of St. George's, Newfoundland, and Vancouver, is reported today as critical.

The Lethbridge district musical festival opened on Tuesday morning, and concludes Friday night. A number of artists from this district will compete, including the Blairmore Male Voice Choir.

IN MEMORIAM

In loving memory of Edward Ennis, died May 25th, 1930.

"Our treasure's in Heaven." Ever remembered by his wife and daughter, Elvira, and father, Mr. S. Ennis.

Newfoundland supplied the United States with \$900,000 worth of blueberries in the past six years.

Frank Chardon, of Fernie, accompanied by Frank Sylvester, of Blairmore, motored to Calgary on Monday.

Miss M. Chardon, accompanied by her mother and Mrs. F. Chardon, are in Lethbridge attending the musical festival.
